

# Using ICISWiki for Communication and Documentation

ICIS 2006 Workshop

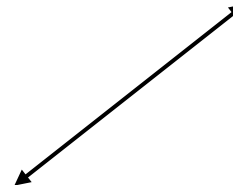

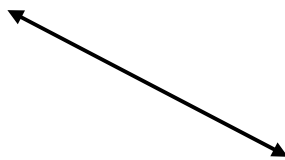

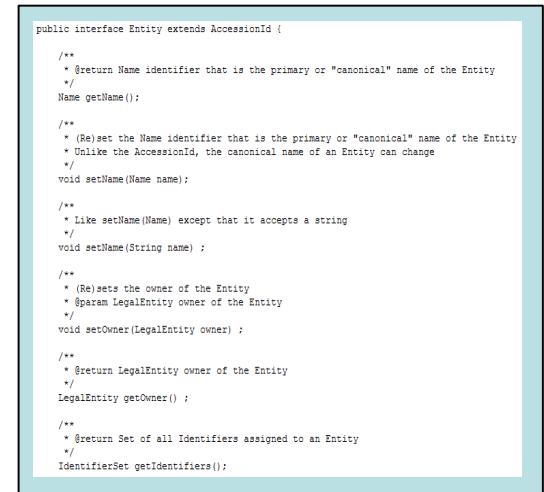

T. Metz, IRRI

# Collaboration Platform Overview

## ICISWiki

## CropForge

# Collaboration System Overview

<http://cropforge.org>

## CropForge

- Collaborative software development environment, hosting multiple projects that are individually managed
- CropForge is based on the Sourceforge software (GForge)
- Key functionality: source code management, tracker systems (bugs, feature requests, help), discussion fora, software release system

# Collaboration System Overview

<http://cropwiki.irri.org/icis>

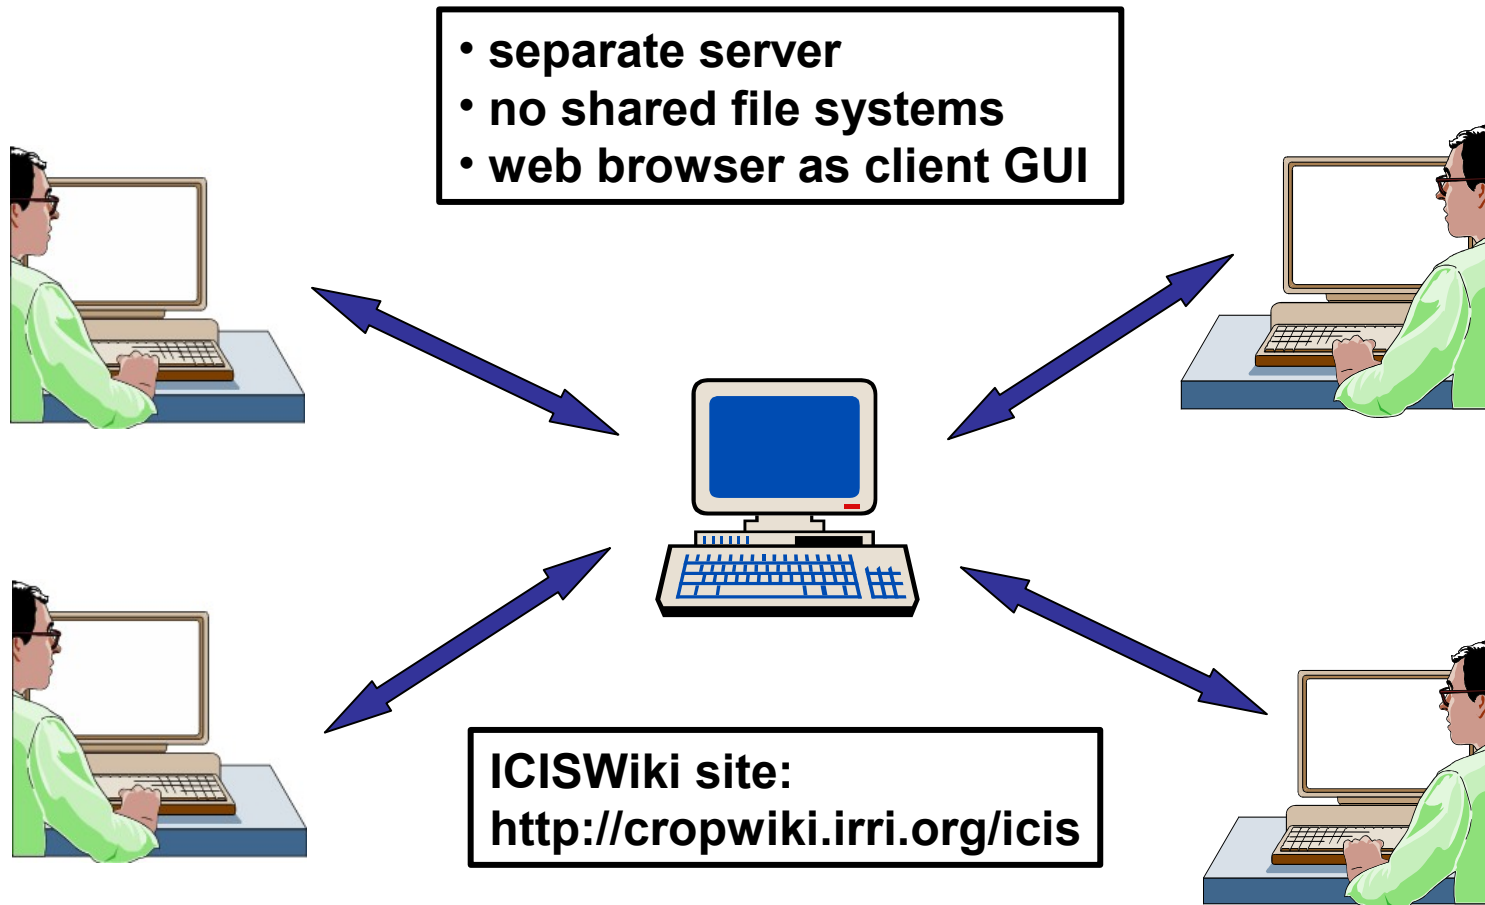

## **ICISWiki**

- Wiki: website that can be edited by users using a web browser
- ICISWiki is based on the MediaWiki software which is used for the Wikipedia
- Key functionality: site-wide recent changes, complete document history, easy revision comparison, discussion pages

# What is a Wiki?

- Wiki is a piece of server software that allows users to create and edit Web pages using a Web browser.
- Wiki has a simple text syntax (markup) for creating pages, cross links between pages, as well as external hyperlinks.
- Wiki allows the organization of contributions in addition to editing the content itself.

### Today's featured article

**Frog** is the common name for **amphibians** in the order Anura. Adult frogs are characterised by long **hind legs**, a short body, webbed **digits**, protruding **eyes** and the absence of a **tail**. Most frogs move by **jumping** or **climbing**. Most frogs have a semi-aquatic lifestyle. They typically lay their **eggs** in puddles, **ponds** or **lakes**, and their **larvae**, called **tadpoles**, have **gills** and develop in water. Adult frogs follow a **carnivorous** diet, mostly of **arthropods**, **annelids** and **gastropods**. Frogs are most noticeable through their call, which can be widely heard during the **mating season**. The distribution of frogs ranges from **tropic** to **subarctic** regions, with most of the species found in **tropical rainforests**. With over 5,000 species described, they are among the most diverse groups of **vertebrates**. However, their **declining numbers** are

### In the news

- Abdul Rahman**, a **Christian** in **Afghanistan**, is acquitted of **apostasy** from **Islam**, sparing him from a possible **death sentence**. 
- The **2006 Commonwealth Games** conclude with **Samaresh Jung** of **India** as the *Best Athlete*, and **Australia** atop the **medal standings** with 221 total medals.
- The maiden flight of the **SpaceX space launch vehicle Falcon 1** (*pictured*) fails shortly after lift-off from **Omelek Island**.
- Nigeria** agrees to extradite former **Liberian leader Charles Taylor** to face

# ICISWiki

The screenshot shows a Mozilla Firefox browser window titled "Main Page - ICISWiki". The address bar contains the URL "http://cropwiki.irri.org/icis/index.php/Main\_Page". The page content includes a navigation menu with links to "Main Page", "Community portal", "Recent changes", and "Help". A search box is present with "Go" and "Search" buttons. A toolbox on the left lists "What links here", "Related changes", "Upload file", "Special pages", and "Printable version". The main content area features the ICIS Wiki logo, a "Main Page" heading, and a sub-heading "International Crop Information System" with an "[edit]" link. The text explains that this is the Wiki site for the International Crop Information System (ICIS) and provides instructions on how to use the site, including creating an account and logging in. It also mentions that users can contact Weng Valerio (r.valerio@cgiar.org) for help. At the bottom, there is a footer with the text "This page was last modified 05:06, 11 January 2006." and "This page has been accessed 3,099 times." along with links to "About ICISWiki" and "Disclaimers". A "Powered By MediaWiki" logo is also visible in the bottom right corner.

## User:Tmetz

I have joined [IRRI](#) in July 2004 as an International Research Fellow for Research Informatics.

My work at IRRI includes the integration of the IRRI genebank information system into [ICIS](#) and the development of data models and data management systems for marker and genotype data.

I have also initiated the deployment of collaborative development systems at IRRI, both for the ICIS project and the [Generation Challenge Program](#). The systems that I am talking about are [CropForge](#), a collaborative software development platform using the [GForge](#) software, which is in turn a branch of the [SourceForge](#) system, as well as [CropWiki](#), a content development system that uses the [MediaWiki](#) software, which is well known for driving the [WikiPedia](#) online encyclopedia that everyone can edit.

# Communication – user2user email

The screenshot shows a Mozilla Firefox browser window titled "E-mail user - ICISWiki - Mozilla Firefox". The address bar contains the URL `http://cropwiki.irri.org/icis/index.php/Special:Emailuser/Tmetz`. The page header includes the user name "Icисuser" and navigation links: "my talk", "preferences", "my watchlist", "my contributions", and "log out".

The main content area is titled "E-mail user" and contains the following text:

If this user has entered a valid e-mail address in his or her user preferences, the form below will send a single message. The e-mail address you entered in your user preferences will appear as the "From" address of the mail, so the recipient will be able to reply.

The form fields are:

- From:** Icисuser
- To:** Tmetz
- Subject:**
- Message:**

A "Send" button is located at the bottom of the message field.

The left sidebar contains navigation links: "Main Page", "Community portal", "Recent changes", and "Help". Below this is a search box with "Go" and "Search" buttons. The toolbox includes "Upload file" and "Special pages".

The footer contains links for "About ICISWiki" and "Disclaimers", and a "Powered By MediaWiki" logo.

# Communication – user watchlist

The screenshot shows a Mozilla Firefox browser window with the title "My watchlist - ICISWiki - Mozilla Firefox". The address bar displays the URL "http://cropwiki.irri.org/icis/index.php/Special:Watchlist/edit". The user "Tmetz" is logged in, with navigation links for "my talk", "preferences", "my watchlist", "my contributions", and "log out".

The main content area is titled "My watchlist" and is labeled as a "special page". It states: "Your watchlist contains 10 pages. Here's an alphabetical list of your watched content pages. Check the boxes of pages you want to remove from your watchlist and click the 'remove checked' button at the bottom of the screen (deleting a content page also deletes the accompanying talk page and vice versa)."

The list of watched pages includes:

- 2006 ICIS Workshop Agenda
- GRIMS
- GRIMS ICIS
- GRIMS Seed Acquisition
- GRIMS Seed Characterization
- GRIMS Seed Management
- GRIMS Seed Multiplication
- GRIMS System Administration
- GRIMS coding
- GRIMS documentation
- GRIMS functionality
- GRIMS glossary
- GRIMS implementation
- ICISWiki
- ICIS Frequently Asked Questions
- Loading Isozyme Data into ICIS
- Main Page
- TDM Gene Management System

At the bottom of the list is a button labeled "Remove checked items from watchlist".

The left sidebar contains navigation links (Main Page, Community portal, Recent changes, Help), a search box with "Go" and "Search" buttons, and a toolbox with "Upload file" and "Special pages" options.

## GRIMS

[ICISWiki main](#)

### Genetic Resources Information Management System (GRIMS) [\[edit\]](#)

#### Introduction [\[edit\]](#)

The Genetic Resources Center ([GRC](#)) at the International Rice Research Institute ([IRRI](#)) has a long history of computerised data management of its genetic resources. The current International Rice Genebank Collection Information System (IRGCIS) was initially created in 1993. It was originally developed using Oracle 6 under a Windows environment. Since then, it was continuously enhanced by the original developer as well as outside consultants, and upgraded to newer versions of the Oracle database server. Currently, the IRGCIS backend is based on Oracle Enterprise Manager version 8.0.5 running on Windows 2000 Advanced Server environment, and the frontend applications were created using Oracle Developer 2000. The functionality of the IRGCIS follows closely the operations of the Genetic Resources Center, as described in the International Rice Genebank Operations Manual [Manual](#).

As part of the World Bank project [\[1\]](#) to upgrade the genebank, GRIMS is being developed as an overhaul of the existing IRGCIS. The development of GRIMS is an integral part of two (2) major activities of the World Bank project, namely: 1) Activity 12 - the upgrading of the IRGCIS and 2) Activity 14 - the **introduction of barcode technology** into genebank operations.

#### Contents [\[edit\]](#)

- GRIMS functionality
- Integration with ICIS
- Software engineering
- Documentation
- Issues and Solutions

# Searching the content - Search

The screenshot shows the ICISWiki main page in a Mozilla Firefox browser window. The browser's address bar displays the URL `http://cropwiki.irri.org/icis/index.php/Main_Page`. # Recent changes

The screenshot shows a Mozilla Firefox browser window displaying the 'Recent changes' page of the ICIS Wiki. The browser's address bar shows the URL <http://cropwiki.irri.org/icis/index.php/Special:Recentchanges>. The page title is 'Recent changes - ICISWiki - Mozilla Firefox'. The browser's menu bar includes 'File', 'Edit', 'View', 'Go', 'Bookmarks', 'Yahoo!', 'Tools', and 'Help'. The browser's toolbar shows navigation buttons (back, forward, home, stop) and a search bar with the text 'W'. The page content includes a navigation sidebar on the left with links for 'Main Page', 'Community portal', 'Recent changes', and 'Help'. The main content area features a 'special page' tab, a 'Recent changes' heading, and a list of recent edits. The list is organized by date, with the most recent changes on May 4, 2006, and older changes on May 2, 2006. Each entry includes a link to the change, the user who made it, and the time of the change. The list of changes includes:

- 5 Error Codes

[edit]

### Introduction

The ICIS Diagnostics Tool is an application that tests the different components of your ICIS installation to determine the cause of error situations. This is useful in troubleshooting when your ICIS application is not functioning properly.

ICIS international crop information system

The diagnostic tool will check the ICIS installation for integrity and error checks. Use this tool to find problems that may cause ICIS applications to fail. Choose the test you wish to run then click the "Run Tests" button.

# Uploading a file

The screenshot shows a Mozilla Firefox browser window titled "Upload file - ICISWiki". The address bar shows the URL `http://cropwiki.irri.org/icis/index.php/Special:Upload`. The page content includes the ICIS Wiki logo, navigation links (Main Page, Community portal, Recent changes, Help), a search box, and a toolbox with "Upload file" and "Special pages" options. The main heading is "Upload file" with a "special page" label. Below the heading, there is instructional text: "Use the form below to upload new files, to view or search previously uploaded images go to [uploaded files](#), uploads and deletions are also logged in the [project log](#). You must also check the box affirming that you are not violating any copyrights by uploading. Press the "Upload" button to finish the upload. To include the image in a page, use a link in the form `[[Image:file.jpg]]`, `[[Image:file.png]]` or `[[Media:file.ogg]]` for directly linking to the file." The form contains fields for "Source filename:" with a "Browse..." button, "Destination filename:", and a "Summary:" text area. There is a checked checkbox for "Watch this page" and an "Upload file" button at the bottom.

The screenshot shows a Windows "File Upload" dialog box. The "Look in:" field is set to "workshop2006presentations". The file list contains: "ICIS\_Release\_Management.ppt", "ICISWiki.ppt", "ICISWiki-v1.ppt", and "Software Release Strategy.ppt". The "File name:" field is set to "ICISWiki.ppt" and the "Files of type:" dropdown is set to "All Files". The "Open" button is highlighted.

# Uploading a file

The screenshot shows a Mozilla Firefox browser window titled "Upload file - ICISWiki". The address bar shows the URL "http://cropwiki.irri.org/icis/index.php/Special:Upload". The page content includes a navigation sidebar on the left with links for "Main Page", "Community portal", "Recent changes", and "Help". The main content area is titled "Upload file" and contains instructions for uploading files, including a warning about copyright and a section on how to include images in a page. The form fields are filled with the following information:

- Source filename: D:\icis\workshop2006presentations\ICISWik
- Destination filename: ICISWiki.ppt
- Summary: ICISWiki Powerpoint presentation for ICIS 2006 workshop

The "Upload file" button is visible at the bottom of the form.

- Help for Wikipedia [1]

### Special Topics

- Creating a Table [2]
- HTML tags [3]

**Warning:** This Wiki installation has an **automatic logout after approximately 60 minutes of user idleness**. If you edit a page and do not preview or save it for more than 1 hour, you may be logged out automatically and may lose your work. You can safeguard your work by copying it from the Wiki editor into an external editor, before attempting to preview or save. If you intend to edit a page for an extended time without previewing or saving, consider using an external editor.
