

The IRRI logo is positioned in the top left corner of the slide. It consists of the letters 'IRRI' in a green, serif font. To the right of the text is a horizontal bar divided into two segments: a yellow segment on the left and a green segment on the right. The background of the slide features a close-up of a yellow flower on the left and a blue textured background with a white grid pattern on the right. A dark blue horizontal band is located below the IRRI logo, containing the title text.

# Implementation of ICIS for Maize and Wheat Progress Report

Graham McLaren  
CRIL

The CIMMYT logo is located in the bottom right corner. It features a stylized white icon of a wheat stalk to the left of the text 'CIMMYT' in a white, serif font. A small 'MR' trademark symbol is located at the bottom right of the text. The background of the slide includes a green wavy shape at the bottom, a blue textured background with a white grid pattern, and a dark blue horizontal band containing the title text.

CIMMYT<sup>MR</sup>

The IRRI logo is displayed in a green, serif font. It is positioned in the upper left quadrant of the slide, above a horizontal bar that is yellow on the left and green on the right. The background of the slide features a close-up of a yellow corn cob on the left and a blue background with a white grid pattern on the right.

# International Maize Information System

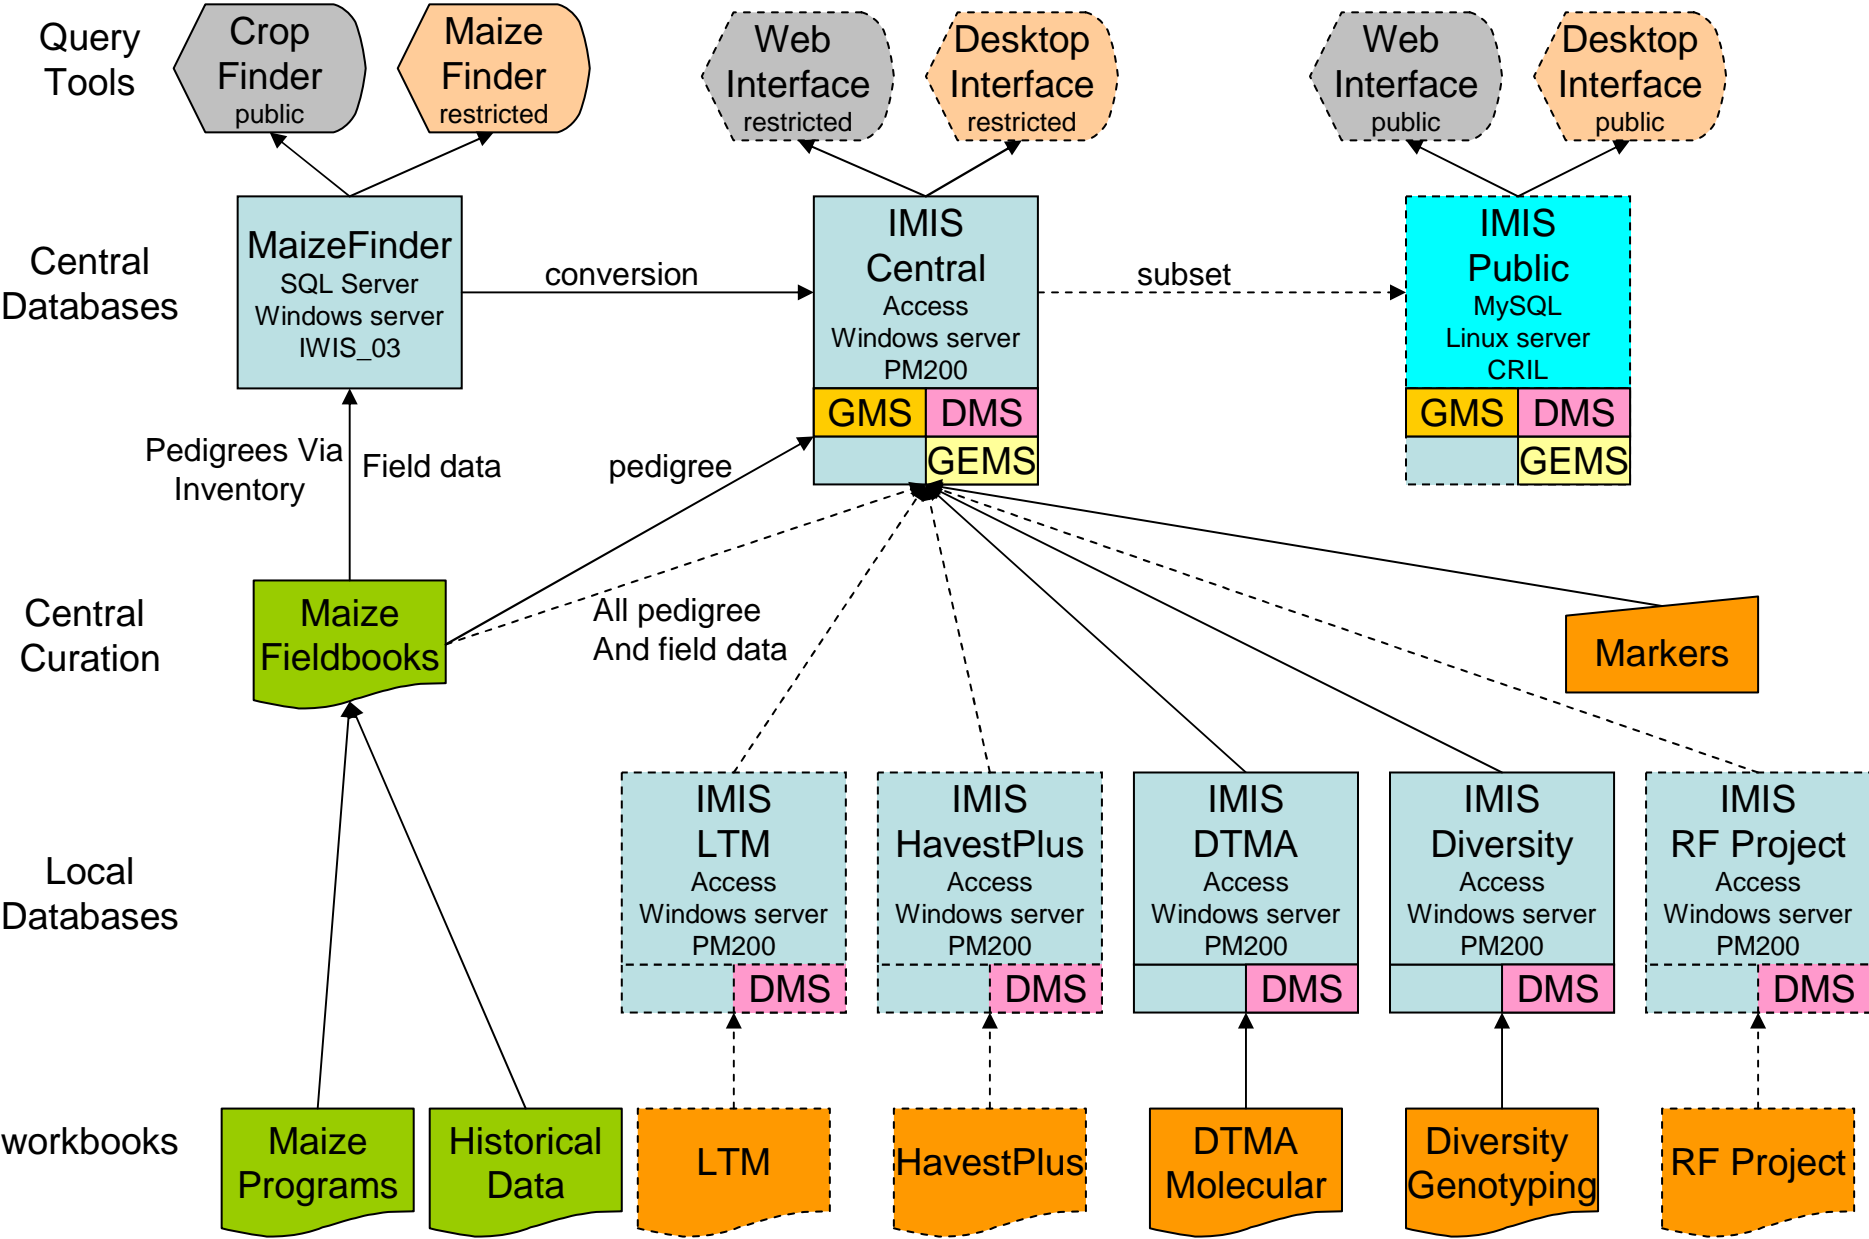

**Eduardo Hernandez  
Juan Carlos Alarcon  
William Eusebio  
Jean Danga  
Graham McLaren**

The CIMMYT logo consists of a stylized white icon of a corn cob to the left of the text 'CIMMYT' in a white, serif font. A small 'MR' trademark symbol is located at the bottom right of the text. The logo is set against a green background that has a wavy, hill-like shape at the bottom of the slide.

 CIMMYT<sup>MR</sup>

----- In development

# Maize Information

# Maize Pedigrees

- CML Pedigrees entered into IMIS
- 2006, 2007 and 2008a inventories for LT Program entered
- 2007 and most of 2008a inventories for H+ Program entered
- MaizeFinder pedigrees reviewed and passed to breeders for further verification before entry

## USE of ICIS Applications for Maize Breeding

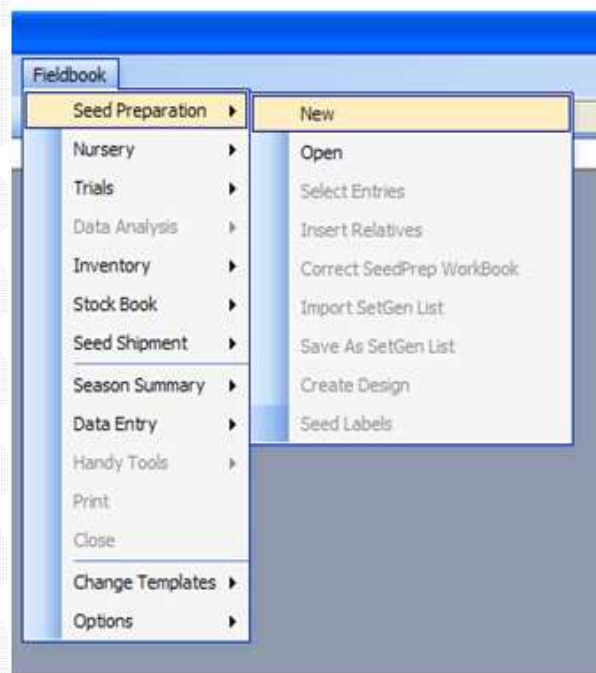

- All 2007 and 2008a nursery lists entered into ICIS
- Coding system for LT program developed
- WorkBook Templates for LT PN and TC Nurseries developed

## Integration of Fieldbook with ICIS

- Import of SetGen Lists to SeedPrep
- Export of SeedPrep Lists to SetGen

# Import SetGen List

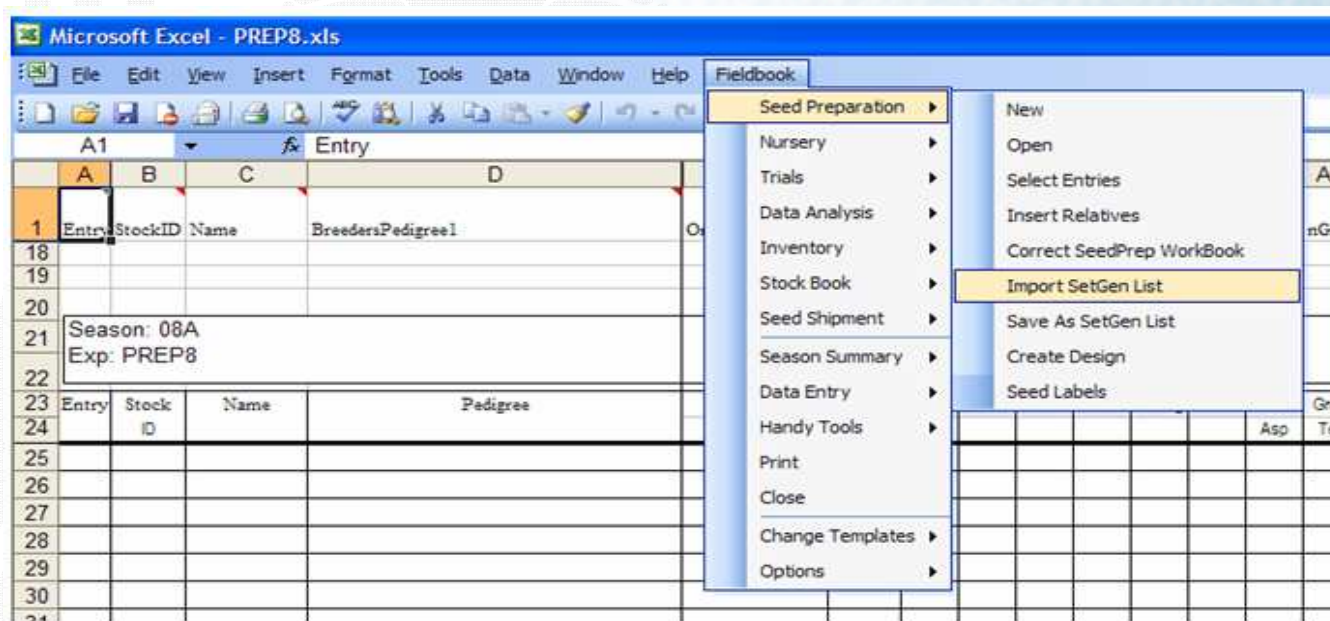

- In the Seed Preparation menu, choose to create a New one or Open an existing one.

## Import SetGen List (cont'd.)

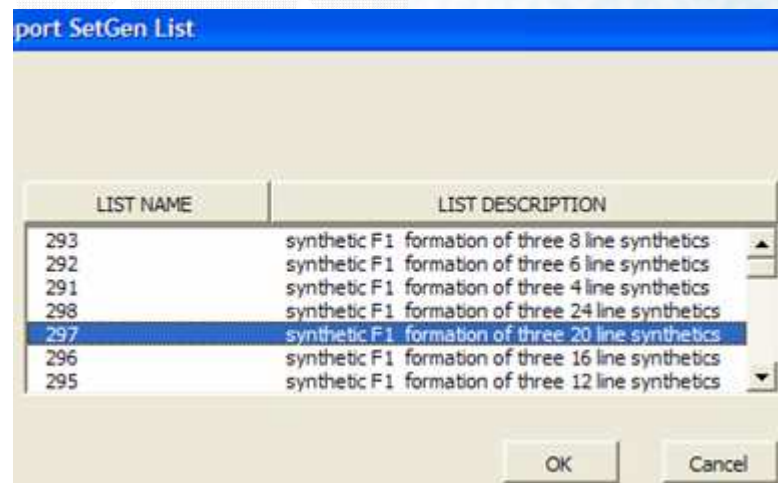

- After opening or creating a new seed prep worksheet, you can now choose from the Seed Preparation menu the Import SetGen List tool.

## Import SetGen List (cont'd.)

- The Import SetGen List dialog box will appear. Select the list you want to import and click OK.

## IMIS for Genomic Data

- Curated Maize diversity data sets in IMIS
- Ready to do this for the SNP studies once the data is available
- Constructing a Rockefeller project database for all the QTL, Maps and summary microarray data from this maize drought project.
- Documenting all genomic datasets on the GREU wiki (<http://cril.cimmyt.org/confluence/display/GREU/Genomic+Datasets>).
- The scope the work to be done in Maize molecular breeding is being ascertained in collaboration with DTMA researchers.
- The CMAP software is being used to visualise map base data for maize ([cmap.cimmyt.org](http://cmap.cimmyt.org)).

The IRRI logo is displayed in a green, serif font. It is positioned in the top left corner of the slide, above a horizontal bar that is yellow on the left and green on the right. The background of the slide features a close-up of wheat grains in the top left and a stylized wheat stalk with a cellular pattern in the center.

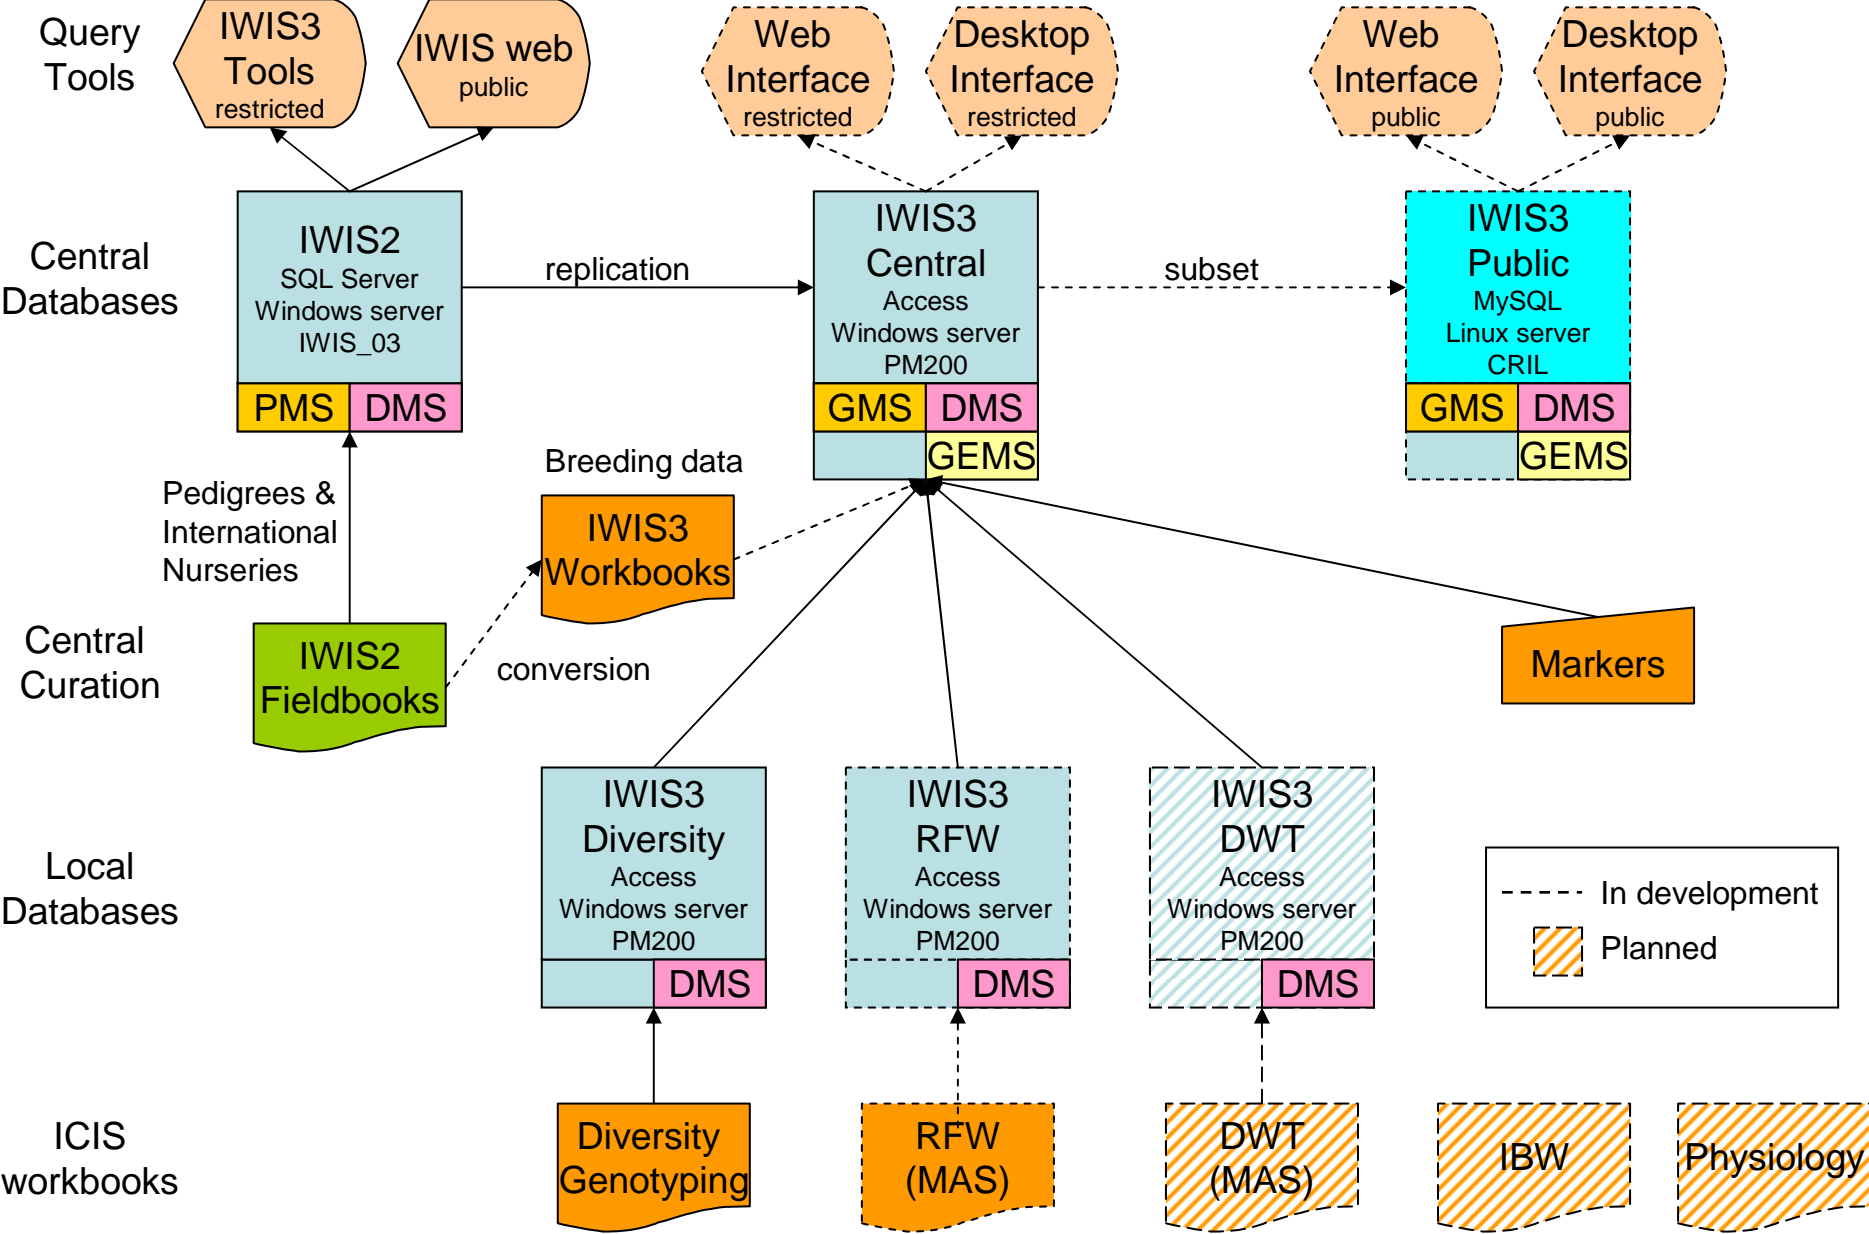

# International Wheat Information System

**Jesper Nørgaard  
Juan Carlos Alarcon  
Bibiana Espinosa  
Guy Davenport  
Miguel Anducho  
Graham McLaren**

The CIMMYT logo is located in the bottom right corner. It consists of a stylized wheat stalk icon to the left of the text "CIMMYT" in a bold, sans-serif font, with a small "MR" trademark symbol to the right.

# Wheat Information

## IWIS3 Central DB activities

- Improved synchronization of IntrIds between IWIS2 and IWIS3
- Updating MGIDs where appropriate (when representing an INTRID)
- New int. nurseries recognized and put in place in IWIS3 new DMS released
- Prepare DBs for v.5.5 (field lengths etc.) and released a new public version of IWIS3
- Continue work with setting up ICIS for Wheat Germplasm Bank for Bibiana Espinosa
- Include GIDs in Excel exporting from IWIS2

# Progress with WGB Inventories

- Contents of many boxes have been entered as Setgen Lists
- Inventory Tracker has been modified
  - To produce barcode labels for boxes and packets
  - Read Lot IDs from barcodes and accept weights from an electronic scale to update inventories

IRRI

B-5-A-1-1 CIMMYT:064-0000000005

GID: -267853

## SMTA (Standard Material Transfer Agreement)

- Create the ICIS environment in order to generate the SMTA.
  1. Create SIDU database
  2. Install web site on server
- Test phase was done by CRIL.
- Install ICIS environment on users PC.
- SIDU and SHU users are training in order to generate the SMTA documents.
- First phase. Generate some (all) SMTA from Jan 2008 to Jun 2008)
- Second phase. Release SMTA site on 1<sup>st</sup> July 2008 and continue generating SMTA.

# SMTA site

**CIMMYT's portal for the online dissemination of information on maize and wheat exported from CIMMYT under the Standard Material Transfer Agreement of the multilateral system of the [International Treaty on Plant Genetic Resources for Food and Agriculture](#)**

## IWIS3 for Genomic Data

- Curated diversity datasets of all SNP and DArT genotyping data in IWIS3
- We have maps for 3 GWP populations and 9 from Triticarte
- Documenting all genomic datasets on the GREU wiki (<http://cril.cimmyt.org/confluence/display/GREU/Genomic+Datasets>).
- Working with Wheat molecular breeding to develop IWIS3 local databases for the Rain Fed and Durum breeding programs.
- The CMAP software is being used to visualise map base data for wheat ([cmap.cimmyt.org](http://cmap.cimmyt.org)).

## New Staff

- Hector Sanchez – Crop Informatics Specialist-Maize
- Arlet Portugal – Crop Informatics Specialist - Wheat
